Angiogenesis inhibition has been proposed as a general strategy to fight against cancers. This book covers different therapeutic targets for angiogenesis interventions with emphasis on clinical development of antiangiogenic drugs that target antiangiogenic cascade in different forms of cancers like breast cancer, multiple myeloma, renal carcinoma, gastrointestinal, prostate and lung cancer.

**Contents**

- Contributors
- Angiogenesis: Antiangiogenesis Strategy and Angiogenesis Inhibitors
- Angiogenesis and Gastrointestinal Cancer
- Breast Cancer Prevention and Treatment with Dietary Agents Affecting Angiogenesis: Progress and Promise
- Angiogenesis in Cancer: Therapeutic Targets and Angiogenesis Inhibitors
- Receptor Tyrosine Kinases in Human Schwannoma
