Advances in Biotechnology

www.ebooks.benthamscience.com/book/9781608050901

About the eBook

This comprehensive text adopts a multidisciplinary approach and covers agricultural biotechnology, industrial and environmental biotechnology, pharmaceutical sciences and drug developments from plant sources, biochemical and molecular studies on gene expression, forestry, genetic engineering, gene delivery approaches, plant tissue culture and biochemical techniques involved in different areas of plant biotechnology.

Contents

- ▶ Biotechnology in The Improvements of Animal Production and Health- A Review
- ▶ Basics of Molecular Genetic Mapping and QTL Analysis in Plants
- ▶ Molecular Breeding in Fescue Grass Species
- ▶ Gene Isolation Prior to Identification of Proteins
- ▶ Molecular Bio-Techniques for Isolation and Characterization of A Gene
- ▶ Salinity Stress in Agricultural Land: Challenges and Opportunities
- ▶ Anthocyanins: Looking Beyond Colors
- ▶ Virus Induced Gene Silencing in Wheat: A Review
- ▶ Mycosynthesis of Nanoparticles
