Frontiers in Anti-Cancer Drug Discovery (Volume 3)

www.ebooks.benthamscience.com/book/9781608058846

About the ebook

Frontiers in Anti-Cancer Drug Discovery is an eBook series devoted to publishing the latest and the most important advances in Anti-Cancer drug design and discovery. Eminent scientists write contributions on all areas of rational drug design and drug discovery including medicinal chemistry, in-silico drug design, combinatorial chemistry, high-throughput screening, drug targets, recent important patents, and structure-activity relationships.

Contents

- HER2 Over-Expression and Gastric Cancer: Molecular Mechanisms and Target Therapies
- Dietary Phenolics as Cancer Chemopreventive Nutraceuticals: A Promising Paradigm
- Flavonoids and their Therapeutic Potential as Anti Cancer Agents: Mechanism, Factors and Regulation
- Antibody-Drug Conjugates as Therapeutic Agents in Oncology: Overview And Perspectives
- Peptidyl-Prolyl Isomerase Pin1: A Novel Target for Cancer Therapy
- Targeting the Molecular Circuitry Underlying Glioblastoma Invasion
- State-of-the-Art Nanopharmaceutical Drug Delivery Platforms for Antineoplastic Agents
