Immune Response to Parasitic Infections: Immunity to Helminths and Novel Therapeutic Approaches Volume 1

About the ebook
This volume covers research on the interaction of major helminth parasites with the immune system. The ebook provides updated information for medical students, clinicians and researchers in the fields of parasitology, applied immunology and novel drug delivery.

Contents
- Neuroendocrine Control of the Immune Response During Helminth Infections
- The Immune Response During Toxocariasis by Toxocara Canis
- Parasite-Mediated Immune Modulation During the Development of Human Cystic Echinococcosis
- The Immunobiology of Urogenital Schistosomiasis
- The Translational Immunology of Trichinellosis: From Rodents to Humans
- Anisakis Simplex Infestation and Immune-Mediated Responses
- Immunomodulation by Parasitic Helminths and its Therapeutic Exploitation
- Parasites-Based Immunotherapy to Treat Allergies and Autoimmune Diseases
