
About the eBook
Frontiers in Neurosurgery is an ebook series which triggers principle issues that still fuel debate in neurosurgery. The series is intended as a reference for practicing endovascular neurosurgeons, vascular neurosurgeons, interventional neurologists and neuroradiologists who have a solid knowledge of neuroangiography.

Contents
- Occipitocervical Fusion
- Occipitocervical Chiari Decompression
- Endoscopic Chiari Decompression
- Endoscopic Transoral Odontoidectomy
- Odontoid Screw Fixation
- Anterior Cervical Foraminotomy
- Anterior Cervical Discectomy
- Selective Percutaneous Endoscopic Cervical Decompression and Discectomy
- Cervical Arthroplasty
- Anterior Cervical Corpectomy
- Minimally Invasive Posterior Cervical Foraminotomy
- Open Posterior Cervical Foraminotomy (Keyhole Approach)
- Bilateral Decompression through Unilateral Approach for Cervical Spondylosis (Tubular Approach)
- Open Cervical Reduction Techniques
- Open Posterolateral C1-C2 Arthrodesis
- Laminectomy - Lateral Mass Screw Fixation
- Cervical Open Door Laminoplasty
- Subaxial Translaminar Screw Fixation
- Mini - Videoassisted Transoracic Approach
- Minimally Invasive Transpedicular Approach
- Costotransversectomy Approach
- Lateral Extraforaminal Approach
- Minimally Invasive Anterior Endoscopic Thoracic Discectomy
- Minimally Invasive PosteriorThoracic Discectomy
- Minimally Invasive Retropertubular Corpectomy
- Second-Generation Total En Bloc Spondylectomy (Second-generation TES)
- Smith-Petersen and Pedicle Subtraction Osteotomies for Spinal Deformity Correction
- Direct Vertebrolytic Body Derotation
- Rod Commination Constructs and Techniques
- Experiences of Vertical Expandable Prosthetic Titanium Rib (VEPTR)
- Robotic Thoracic Surgery
- Lumbar Foraminotomy
- Minimally Invasive Endoscopic Bilateral Decompression through a Unilateral Approach for Lumbar Spondylosis
- Transforaminal Endoscopy for Disc Herniations
- Minimally Invasive Endoscopic Decompression of Foraminal Stenosis under Local Anesthesia
- Foraminal and Diskal Endoscopic Rhizotomy
- Lumbar Posterior Dynamic Stabilization with Interspinous Devices
- Cortical Bone Trajectory Pedicle Screw Fixation Mast Technique
- Percutaneous Lumbar Transfacet Screw Fixation
- Posterior Dynamic Stabilization
- Surgical Approach to the Anterior Lumbar Spine
- Transpedicular Approach for Thoracolumbar Interbody Fusion - XLIIF
- Minimally Invasive Posterior Lumbar Interbody Fusion (MIPEF)
- Open Transforaminal Lumbar Interbody Fusion
- Minimally Invasive Transforaminal Lumbar Interbody Fusion (MIS TIF)
- Intramedullary Tumor Resection
- Spinal Hemangioblastoma Resection
- Spinal Extramedullary Epidural Resection
- Spinal Schwannoma Resection
- Spinal Meningioma Resection
- Minimally Invasive Thoracic Intradural Extramedullary Tumor Resection
- Sacral Tumors Resection
- Thoracolumbar Extradural Arachnoid Cyst Surgery
- Lumbar Synovial Cyst Surgery
- Treatment of Tumor (Pinealoma) Cysts by Open or Endoscopic Assisted Exclusion
- Surgical Treatment of Spinal Dural Arteriovenous Fistulas
- Surgery of Intramedullary Cavernous Malformations
- Osteotomy
