Frontiers in Drug Design & Discovery Volume 7

About the eBook

Frontiers in Drug Design and Discovery is an eBook series devoted to publishing the latest and the most important advances in drug design and discovery. Eminent scientists have contributed chapters focused on all areas of rational drug design and drug discovery including medicinal chemistry, in-silico drug design, combinatorial chemistry, high-throughput screening, drug targets, and structure-activity relationships. This eBook series should prove to be of interest to all pharmaceutical scientists who are involved in research in drug design and discovery and who wish to keep abreast of rapid and important developments in the field.

Contents

- Metabolic Pathways and Chemotherapy Drugs
- Cardiotoxicity of Cancer Chemotherapy—Recent Developments
- Advances in Cancer Therapy: Novel Approaches in Combined Drug Treatments
- Chemotherapy for Uterine Sarcomas: A Review
- Angiogenesis Inhibitors from Natural Sources
- Personalized Chemotherapy of Tumor Disease Based on System Modeling
- Nanotherapeutics: Future Medicine For Infectious Diseases
