Cancer Metastasis and Cancer Stem Cell/Niche

About the eBook
Cancer Metastasis and Stem Cell/Niche explains the invasiveness and metastasis of cancer cells in the light of information gained from the CSC / niche theory. Five chapters present a review on the fundamental relationships between CSCs, their niche and metastasis, the regulation of cell surface glycan expression in CSCs, tumor endothelial cells and metastasis, toll-like receptor 4 (TLR4)-mediated premetastatic microenvironment, and in surgical cancer metastasis.

Contents
- Fundamental Relationships Between Cancer Stem Cells, the Cancer Stem Cell Niche and Metastasis
- Regulation of Cell Surface Glycan Expression in Cancer Stem Cells
- Tumor Endothelial Cells and Cancer Progression
- Metastatic Cancer Stem Cell Niche and the Tolllike Receptor 4 (TLR4)-mediated Premetastatic Microenvironment
- Cancer Stem Cell and Clinical Cancer Metastasis in Surgical Oncology
